

Using the Rover in Hortis

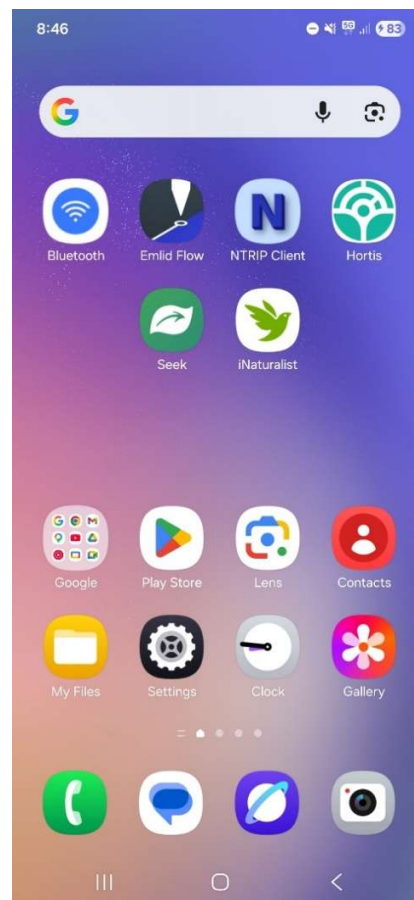

By Zane McAleer

Step**1.**

Mount the rover onto the pole and turn on the rover. Wait for the lights to stop blinking and stay on.

**Step****2.**

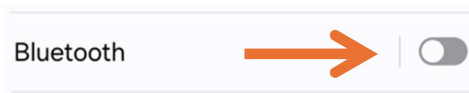

Turn on the mobile phone and allow the phone to boot up to its home screen. The home screen should look like this (the position of the icons has been locked so they won't move around).

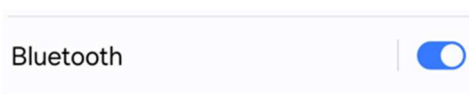

- Step 3.** Tap the Bluetooth icon on the phones display.

- Step 4.** Turn on Bluetooth by tapping the toggle switch.

- Step 5.** The Bluetooth toggle should now look like this.

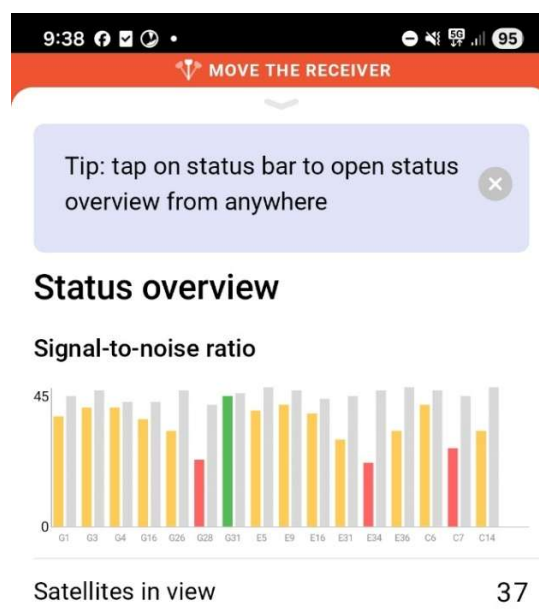

- Step 6.** Locate the home button at the bottom centre of the display. Tap the home button.

- Step 7.** Tap on the Emlid Flow icon found on the home screen. The app will open and automatically connect to the rover.

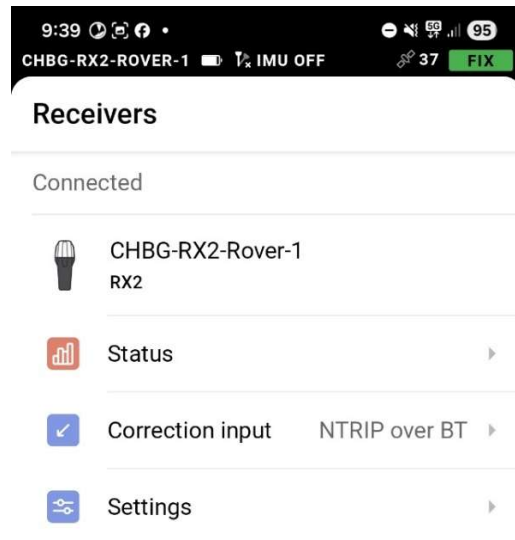

- Step 8.** Wait a minute or two while the rover finds the satellites. When ready, the status at the top of the screen will ask you to "move the receiver."

Step 9.

With the pole touching the ground, move the rover around in a circular pattern until the status at the top of the screen turns green.

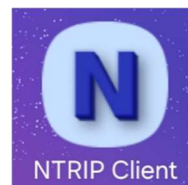

Step 10.

Tap on the home button at the bottom of the display.

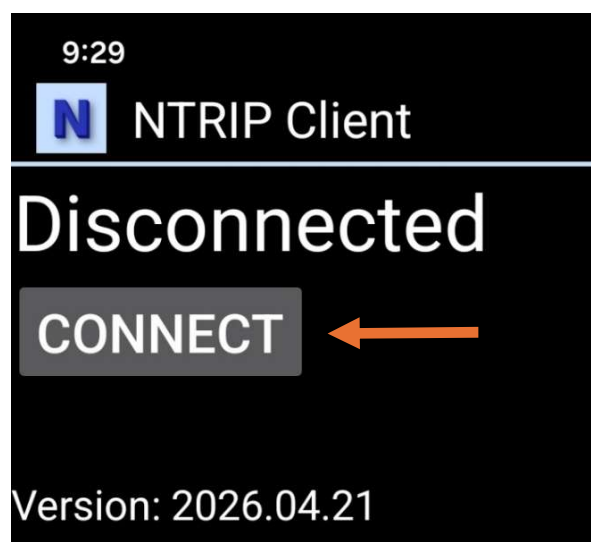

Step 11.

Tap on the NTRIP Client icon found on the home screen.

Step 12.

Tap on connect.

Step 13.

Tap on the home button at the bottom of the display.

**Step
14.**

Tap on the Hortis icon found on the home screen.

**Step
15.**

Tap the hamburger menu button (top left of display).

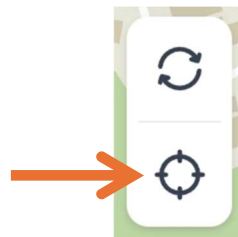

**Step
16.**

Tap on map

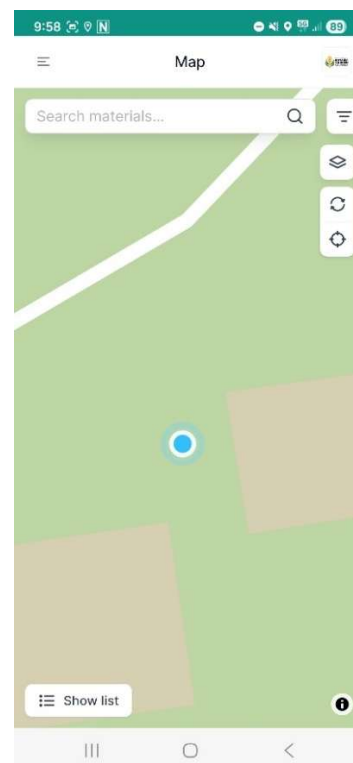

**Step
17.**

Tap the “centre on device” button (looks like cross hairs, near top right of the screen).

**Step
18.**

Done! Hortis will now position the centre of the screen onto the position of the rover.
